

Trade batt selection guide

The science of
making a better **batt**

PINKOLOGY™

PINK[®]
BATTS
Comfort for life™

PINKOLOGY™

Introducing next generation batts, engineered for a fast firm fit

Fits & holds in place

For maximum thermal and acoustic performance

Easy to cut & install

Designed to save you time and money

Next generation formula

For better recovery and softer handling

From our next generation formula to innovative new packaging, PINKOLOGY™ represents our passion towards making a better glasswool insulation batt.

Our next generation organic binder produces a glasswool batt that is rigid yet soft to handle, and recovers to its full thickness faster, without extra fuss.

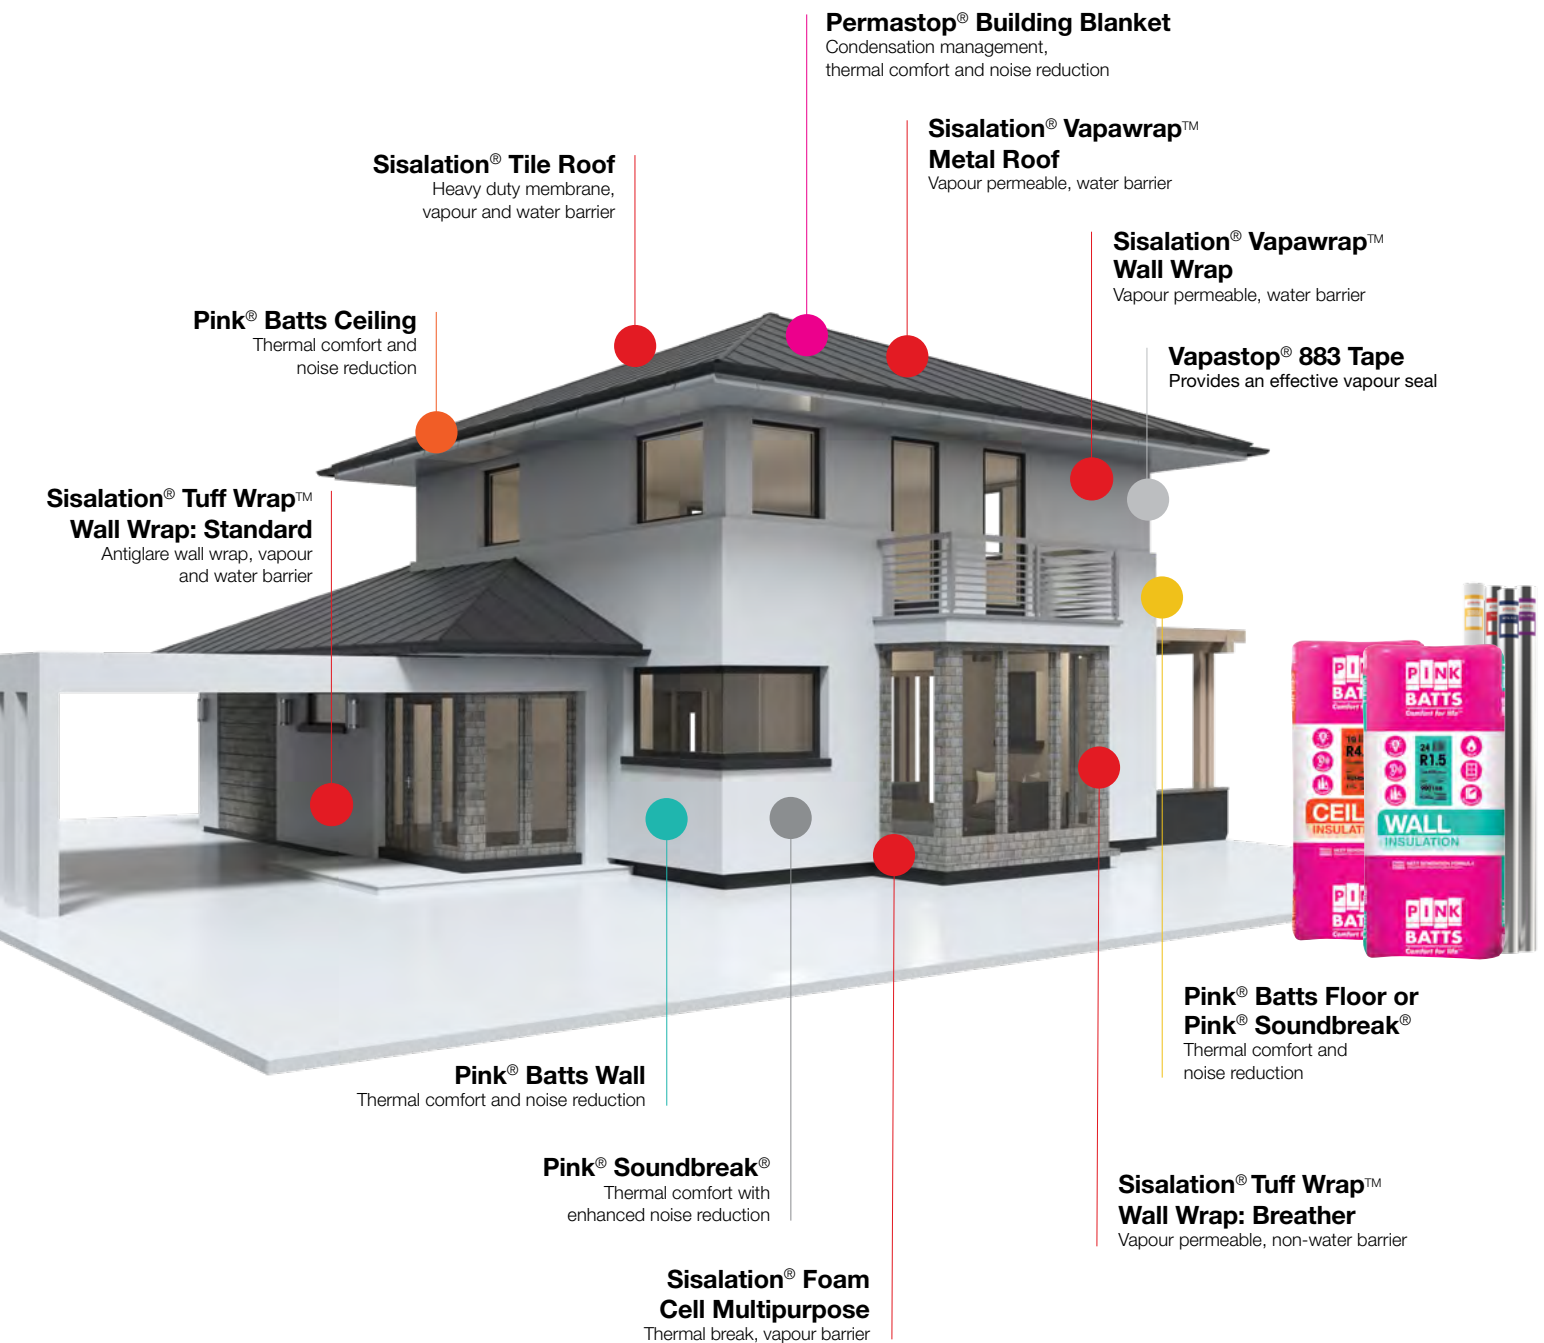

Cutting and installation is easy too. And Pink® Batts stay in place. Which is important, because a gap of only 5% can result in up to a 20% drop in thermal performance.

At Fletcher Insulation we do not compromise on quality. With Pink® Batts, you can be confident that the insulation you install will perform better for longer. We guarantee it, with a lifetime consumer warranty.

The whole-of-home solution that puts you in the pink.

Our **PINKOLOGY™** whole-of-home approach features an innovative system of complementary insulation products available in a range of Material R-Values to suit all Australian climate zones. Everything you need to create a comfortable, energy efficient home for your customers is here. From Pink® Batts for walls, floors and ceilings to SISALATION® building membranes for walls and roofs, and PERMASTOP® Building Blankets. Plus Pink® SOUNDBREAK®, specifically designed to reduce the volume of noise coming in from outside, as well as unwanted noise between rooms inside the home.

When it's Pink® it fits all together better. You save time and money, and get a great result.

For SISALATION® products see our building wrap selection guide

Pick the right **Pink®** product for your next project*

Pink® Batts Wall

Internal & External Walls

High thermal performance + effective noise reduction

Pink® EmberGuard™ Building Blanket

A non-combustible, mineral wool building blanket, that can be compressed under metal sheet and tiled roofing to provide peace of mind against ember attack.

It seals gaps under the corrugations or ribs of the roofing material and between roof components in accordance with the construction requirements of AS3959-2009 Clause 5.6.2, making it suitable for use in bushfire prone areas.

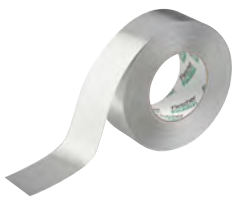

NOMINAL THICKNESS (mm)	WIDTH (mm)	LENGTH (m)	QUANTITY PER PACK	L/M PER PACK	PRODUCT CODE
25	300	20	4	80	910242

Lifetime consumer warranty†

Non-combustible in accordance with AS/NZS1530.1

Vapastop® 883 Reinforced Foil Tape

A strong, reinforced foil tape that conforms well to corners and irregular surfaces to provide an effective vapour seal over the joints of reflective insulation products and/or composites.
